

Is food safety your #1 priority? If so, CRC is here to help.

CRC INDUSTRIES recognizes the issues facing today's food processors and food manufacturers as it relates to the use of maintenance chemicals. We understand the importance of regulatory compliance and make it our business to stay informed of changes that can affect the food industry. As a part of our on-going commitment to this complex industry, we now offer the **StopLight™ Food Safety Program**. This revolutionary program will proactively assist you in the handling, evaluation and control of maintenance chemicals by assigning a color-code to each applicable department and CRC product.

StopLight™ Posters

Each of the 3 **StopLight™ posters** is designed to assist you in clearly identifying which products should be used in specific areas and are to be posted outside of the appropriate application areas. All 3 posters are translated into the 7 languages most commonly found in manufacturing/processing facilities. The **Authorized Use poster** is designed to hang in the Store Room and provides an area under each color to identify the departments that correspond to that product color.

StopLight™ Safety Stickers & Shelf Labels

Once you have identified all the CRC products as either red, yellow or green, the colored **StopLight™ safety stickers** are placed on the product label as a quick reference to insure the proper product is being used in the appropriate areas. The **StopLight™ shelf labels** adhere to the "lip" of the flammable or storage cabinet shelves and have an area to write in the "User Part #", the "CRC Part #" and an area to place a colored **StopLight™ safety sticker** for usage and reordering identification.

StopLight™ Forms & Flyers

Determine which products and departments are designated as red, yellow and green using the **StopLight™ Authorization Form**. Once the **StopLight™ Authorization Form** is filled out, the completed form is signed by members of the HACCP team and posted in the Tool Crib and Supply Room. The **NSF/USDA Classification flyer** is posted in the Store Room as a quick reference guide to identify the various non-food compound categories. Use the **StopLight™ Collateral Materials Order Form** to replenish your supply of StopLight™ Program materials either directly through CRC Customer Service or your local authorized CRC distributor.

Food Grade Products Catalog

All **CRC** products authorized or registered for use in food processing or manufacturing facilities are found in one convenient location — the **Food Grade Products Catalog**. Keep it on hand and available to view CRC's broad range of products acceptable to the food industry.
